OK! We hear you! Due to the incessant demand we are restocking the book POCKET COMPUTER PROGRAMS. If you missed out earlier (or, my heavens, you haven't heard about it!) you can again order this superb collection of programs that are specifically tailored for Radio Shack PC-2 and Sharp PC-1500/1500A owners. The book contains 50 ready-to-run programs written by experts throughout the world and compiled by the editor of the *POCKET COMPUTER NEWSLETTER.* Here is just a sample of what is included: business programs keep personal calendars, calculate amortizations, monitor trip expenses, calculate payroll taxes. Math programs convert numbers to any base, solve polynomials and simultaneous equations . . . even do regression analyses. Engineering programs do fast Fourier transforms, design electronic filters, fit curves, plot histograms. Home and entertainment programs keep shopping lists straight, take memos, and play Hangman or Tic-Tac-Toe -- or even Prelude II from the Well Tempered Clavier. And, there is much, much more! Each application includes an introduction by the author, a complete program listing, and a sample run. A real treat for any PC-2 or PC-1500 owner! Order your copy while our new supply lasts using the order form below. Hurry, this may be the last time it is available.

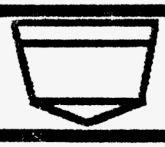
AND . . . speaking of opportunities: Many of you know that in 1983 we began publishing what was planned to be a four-part series on MACHINE LANGUAGE PROGRAMMING SHARP PC-1500 & RADIO SHACK PC-2 POCKET COMPUTERS. Parts 1 and 2 of this brilliant compendium had been published when the balance of the planned series had to be cancelled due to the fact that the author was unable to complete the treatise (due, we regret to report, to serious cardiac illness). The portion that had been published explained the basic machine language instruction set of the LH-5801 CPU that is used in the PC-2 and PC-1500, illustrated uses of of these directives, and provided a number of simple programming examples. The information contained in these two parts is of immense value to anyone interested in using these pocket computers at the machine language level. We have refrained from marketing the copies of parts 1 and 2 that we have held on hand during the past year in the hopes that the author would be able to complete the series, in which case the inventory would be used to provide complete four-part sets. We have recently been advised that it is not practical for the series to be completed. Thus, we are now free to market the remaining inventory of parts 1 and 2. Be sure to order this highly illustrated machine language programming guide if you have any interest in the subject matter. It is truly a valuable one-of-a-kind reference that has no equal in the world of pocket computing. Use the convenient order form below.

1982 back-issues of *PCN* are almost sold out! If you have been thinking about having these editions in your files (Issues 11 - 20), better order soon! The stock of 1983 issues is a little better, but these won't last forever, either. Bring your collection up to date before the opportunity is lost forever . . . .

PC-3 (Radio Shack) owners as well as Sharp PC-1250/1251 owners may be interested in a collection of programs we originally published for PC-1 and PC-1211 users. We called it our POCKET SMORGASBORD and it has stuff such as Amortization, Coder/Decoder, Table/Chart Formatter, Polynomial Arithmetic, Filter Design, Linear Interpolation, Triangles Solver, Perpetual Calendar and Aviation Flight Planner programs, plus other tid-bits. They will all run just fine on the PC-3/1250/1251 units.

RENEWALS for the 1985 calendar year are now being accepted. Due to repeated requests for a more frequent publication schedule, we will be increasing the number of editions in 1985 to eight. The new year promises to bring a flood of new models, including some mighty tiny (but powerful!) "notebook-sized" portables. The plan to expand our coverage to include these popular machines. We will, of course, remain the world's number one source of Pocket Computer information! Renew now!

POCKET COMPUTER NEWSLETTER



__ Send me the POCKET COMPUTER PROGRAMS book right away! $14.95 in U.S. (Prices higher outside of United States.)

__ Send me parts 1 & 2 of the PC-1500/PC-2 MLP Tutorial! $9.97 in U.S. (Prices higher outside of United States.)

__ Send me back-issues numbers 11-20 (1982) of *PCN.* $30.00 in U.S. (Prices higher outside of United States.)

__ Send me back-issues numbers 21-30 (1983) of *PCN.* $36.00 in U.S. (Prices higher outside of United States.)

__ Send me POCKET SMORGASBORD for the PC-3, PC-1250/1251. $7.50 in U.S. (Prices higher outside of United States.)

__ Enter my *PCN* renewal for 1985 (Issue numbers 37 - 44). $24.00 in U.S. (Prices higher outside of United States.)

__ Connecticut residents must add 7.5% State Sales Tax on all items except newsletter subscriptions. Thank you!
